PROFESSIONAL SUMMARY

Motivated React Native Developer with 8 years of hands-on experience in building and maintaining cross-platform mobile applications. Skilled in developing reusable UI components, integrating REST APIs, and ensuring smooth performance across Android and iOS platforms. Familiar with app architecture basics, performance optimization, and end-to-end app deployment. Contributed to features in domains such as Fintech, Media, and E-commerce while collaborating closely with designers, backend developers, and QA teams to deliver reliable, user-focused applications.

CORE COMPETENCIES

- **Frontend:** React Native, React.js, TypeScript, JavaScript (ES6+), Next.js.
 - **State Management:** Redux, Redux-Saga/Thunk, Context API, React Query.
 - **Specialized:** Android TV & Apple TV (Focus Engine), Video Streaming (HLS/Dash).
 - **Backend/DevOps:** Firebase, REST APIs, GraphQL, WebSocket, CI/CD (Fastlane/Bitrise).
 - **Database & Tools:** SQLite, Realm, Git, JIRA, Xcode, Android Studio, Jest.
-

PROFESSIONAL EXPERIENCE

Logicwind, Surat | *Senior React Native Developer* | **May 2024 – Dec 2025**

- Architecting scalable mobile solutions using **TypeScript** and **Redux**, reducing technical debt by implementing clean code principles.
- Optimized application startup time and frame rates, resulting in a **25% increase in user retention**.
- Mentoring junior developers and conducting code reviews to ensure 100% adherence to industry standards.

Techtic Technolab PVT LTD, Ahmedabad | Sr. React Native Developer | Oct 2022 – Apr 2024

- Engineered complex integrations for **Payment Gateways (Stripe/Razorpay)** and Google Maps API.
- Developed a predictable data flow architecture using Redux, improving app stability across fragmented Android devices.
- Collaborated with UI/UX teams to translate high-fidelity Figma designs into pixel-perfect, responsive components.

LogixBuilt, Surat | React Native Developer | Dec 2020 – Oct 2022

- Owned the full SDLC for 3+ major client projects, from initial requirement gathering to Play Store/App Store deployment.
- Enhanced cross-platform compatibility, ensuring seamless performance across iOS and various Android OS versions.

I-Pangram, Surat | React Native Developer | Feb 2018 – Nov 2020

- Developed core features for early-stage startups, focusing on high-performance UI and local data persistence via Realm.

KEY PROJECTS

Media Platform (Streaming Service) | React Native, Android TV, Apple TV (6 Month)

- Worked on a media streaming application delivering both **video and podcast content**. Developed key UI modules including **Video Carousel, Video Grid, and Featured Video sections**, along with similar **Podcast Carousel, Grid, and Featured modules** to ensure a consistent user experience.
- Implemented a **custom video player** with full control handling, including **play/pause, seek, fullscreen mode, and minimize functionality**. Also built a **custom audio player for podcasts**, managing playback controls and background audio behavior.
- Enhanced user engagement by implementing **playlist functionality** for both audio and video content, enabling users to add and manage featured media. Integrated **share functionality** for videos and podcasts to support content distribution across platforms.
- Collaborated with backend APIs to fetch and render dynamic media content while ensuring smooth playback performance and responsive UI across devices.

TBYT (Event & Ticketing) | React Native Developer (4 Month)

Worked on **Tabyt**, an event management platform consisting of **two applications**: an **Organizer App** and a **User App**.

Worked on both **Organizer and User applications** for an event management platform. On the Organizer side, enabled event creation and management, implemented features to add and configure tables, tickets, and menus, and developed a dashboard screen to display complete event details and management insights. On the User side, implemented location-based event discovery to show nearby events, built booking flows for purchasing tables, tickets, and menus, and added functionality that allows users to add menu items later after completing the initial booking.

Integrated backend APIs, handled application state, and built reusable components while maintaining performance and scalability across both applications.

Carfour | Flutter (1 Month)

- Worked on **Carfour**, a donation application focused on seamless and reliable contributions, including **offline-first functionality**.
 - Implemented **offline QR code scanning**, allowing users to scan donation QR codes without an internet connection. Scanned data is **securely stored locally** and **automatically synced to the server** once internet connectivity is restored.
 - Developed a **custom QR code scanner** with proper **validation logic** to ensure only valid donation QR codes are accepted. Built a donation flow where users can **browse and select organizations** and complete donations by **scanning QR codes**.
-

EDUCATION

- **Master of Computer Application (MCA)** | Gujarat Technological University | **GPA: 8.0** | **2016 - 2018**
 - **Bachelor of Computer Application (BCA)** | VNSGU, Surat | **GPA: 7.3** | **2013 - 2016**
-

LANGUAGES

- English (Professional Working Proficiency)
- Hindi & Gujarati (Native)
