-

Work Experience

React Native Developer — Logicwind

2024 - Present

- Building and maintaining high-performance React Native applications for Android & iOS.
- Implementing scalable architecture using Redux & Context API.

- Optimizing performance, resulting in improved responsiveness and user experience.
- Integrating advanced features and third-party services.

Senior React Native Developer — Tectic Technolab Pvt. Ltd.

2022 – 2024

- Led development of feature-rich mobile applications from concept to deployment.
- Integrated REST APIs, payment gateways, social platforms, and geolocation services.
- Enhanced app performance, contributing to a **30% increase in user engagement**.
- Mentored junior developers, improving team productivity and code quality.

Senior React Native Developer — LogixBuilt

2020 – 2022

- Developed enterprise-level mobile solutions with high stability and smooth UI.
- Ensured cross-platform compatibility and delivered consistent UI components.
- Managed full development lifecycle including design, development, testing, and releases.

React Native Developer — I-Pangram

2018 – 2020

- Developed and maintained mobile applications with responsive UI and stable features.
- Improved app functionality through system updates and new feature rollouts.
- Ensured compatibility across iOS and Android platforms.

Projects

Capital Media Platform — React Native & React Native TV OS

A full-scale media streaming platform built for **Mobile, Android TV, and Apple TV**.

- Developed the entire **React Native TV OS application**, handling navigation, layout, and performance optimizations.
- Solved major **focus-management challenges** on Android TV & iOS tvOS, ensuring smooth directional navigation.
- Built complete **Video module** including playlists, fullscreen player, mini-player, seek controls, quality levels, and watch history.
- Implemented **Podcast module** with background audio support, episode listing, and seamless streaming.
- Added support for **Collections, Tags, and Article modules** with dynamic layouts and reusable UI components.
- Ensured high performance across all platforms through optimized rendering and caching. A cross-platform media streaming ecosystem built for **Mobile + Android TV + Apple TV**.
- Developed complete **TV OS application** with custom focus engine, autoplay, carousels, and smooth remote navigation.
- Built video module supporting playlist, watch history, mini-player, quality selection, and full-screen player.

- Implemented podcast module including audio streaming, background playback, and episode listing.
- Created dynamic collections, tags, and article sections with reusable components.
- Ensured optimized performance across all platforms.

Tabyt — React Native

A voucher donation platform enabling users to donate to clubs by scanning club QR codes. Implemented advanced search, scanning functionality, and secure voucher transfers.

PrettyFox — React Native

A beauty & salon marketplace where users can find nearby shops, buy products, create events, and post updates. Built product listing, event features, and location-based discovery.

Valkyrie — React Native

A laundry service app offering pickup & drop scheduling, order tracking, and dynamic pricing. Developed complete order flow and user dashboard.

Carfour — Flutter

A multi-service marketplace app including ticketing, event management, menu display, and table reservation system. Implemented user purchase experience and event workflows.

Education

Master of Computer Applications (MCA)

Gujarat Technological University (2016 – 2018)

Bachelor of Computer Applications (BCA)

Veer Narmad South Gujarat University (2013 – 2016)
